

**ALL-TR 221-2.16 (Fisher Road) Bridge Replacement  
PID No. 117343**

The Allen County Engineer, in partnership with ODOT, is proposing to demolish the bridge on Township Road 221 (Fisher Road) over the Ottawa River located in Jackson Township northwest of the Village of Lafayette. The existing bridge was constructed in 1924 and has been closed to vehicular traffic since 1996. The project will remove the existing bridge and embankments and shape the banks to blend into the existing slopes. A new bridge will not be built.

Construction is expected to occur in the summer and fall of 2023.

Work at this structure will occur in the regulated floodplain of the Ottawa River. Impacts to this floodplain are anticipated to be minor and result in no rise in localized flood levels. A Summary of Floodplain Impacts is available at the following website: <https://www.allencountyohengineer.com/wp-content/uploads/2022/10/ALL-TR-221-2.16-Fisher-Road-Signed-Summary-of-Floodplain-Impacts-002.pdf>
